DETAILED ACTION

Claim Rejections - 35 USC § 103

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Monte (USP No. 5,578,336).

Monte teaches a chewing gum composition consisting of a gum center which comprises layers of coatings, in which one layer is coated with a vitamin, vitamin defines a medicament (see the abstract and columns 3 and 4). Monte discloses sugarless sweeteners, as well as xylitol and maltitol which reads on claim 11. Xylitol and

maltitol defines a taste masking agent (see columns 2 and 3). At col.3, lines 18-23 and col.12, example 29, Monte discloses the coating composition is applied to the gum center in a coating layers.

Monte does not teach the particular amounts of the coating nor the amounts of the taste masking agent.

However, absent a showing in the criticality of the particular amounts, there are no unexpected results, the Monte reference does teach a gum center which is coated with a medicament. Through routine experimentation, the particular amounts can be readily determined by one skilled in the pharmaceutical art. The expected result would be to provide drug delivery to a gum center product which comprises a medicament in a coating layer.

Double Patenting

Claims 8-20 of this application conflict with claims 8-15,36-48 of Application No. 10/206,492. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re*

Art Unit: 1615

Ockert, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 8-20 provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 8-15,36-48 of copending Application No.10/206,492. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

No claims allowed.
